

## Ovation Software Packs 64bit

|  | SILVER | GOLD | PLATINUM |
|--|--------|------|----------|
| Virtual Studio Core (Extended Plugins)                       |        | *    | *        |
| Pyramix Editing Package                                      | *      | *    | *        |
| Pyramix Sound Design Package (NATIVE Pack)                   |        | *    | *        |
| High Sampling Frequency (88.2 to 384kHz)                     |        | *    | *        |
| MIDI (Command / MMC): Requires a MIDI interface              | *      | *    | *        |
| COM (RS-232)   |        | *    | *        |
| TCP/IP   |        | *    | *        |
| GPIO Support: Requires SeaLevel I/O CON-SGU-1608/1616        | *      | *    | *        |
| TC Sync (LTC / MTC): LTC Requires Merging Hardware           |        | *    | *        |
| Sony 9pin (RS-422) Machine Control: Requires a RS422 Adapter |        | *    | *        |
| Dataton WATCHOUT Synchronization                             |        | *    | *        |
| Mixer Remote Control EMC / HUI                               |        | *    | *        |
| Ross Video Cue Control Automation                            |        | *    | *        |
| Ross Video RAP Mixer Control                                 |        |      | *        |
| Mixer Remote Control Oasis / EuCon                           |        |      | *        |
| Ovation Mixer Automation                                     |        |      | *        |
| Ovation Web Server   |        |      | *        |
| DSD/DXD sample rate support                                  |        |      | *        |

All software prices include the cost of an installation and licencing pack. All MassCore packs also include the NET-MSC-GBEX 1 & RTX Licence Dongle

### Ovation Software Packs (ASIO)

SILVER with 2 channel buses (Multiple Stereo) and 24 replay channels

GOLD Pack with 6 channel buses (Multiple 5.1) and 96 replay channels

PLATINUM with 24 channel buses (Multiple 24-speaker arrays) and 128 replay channels

### MassCore Engine Bolt on for Ovation or Pyramix Software Packs

MassCore Audio Engine 48 speaker outputs per bus & 48 replay channels

MassCore Audio Engine 128 speaker outputs per bus & 128 replay channels

MassCore Audio Engine 256 speaker outputs per bus & 384 replay channels

The MassCore Engine is a must when users require ultra-low, fixed latencies or are in mission critical performance environments. Also, the MassCore Engine is what is able to help provide the panning engine with enough power to let users create extended speaker output configurations.
