

VCube Release Notes

Installation

Please consult the Installation Guide located on the Merging Installation Media (USB Memory card) for details on the hardware and software installation procedure and Authorization Key registration process.

- To install the VCube software insert the Merging Installation Media - the installation program should auto-start.

Updates

Please check our Web site <http://www.merging.com> periodically for information, patches and updates.

VCube 9 Release Notes

Installation:

- **VCube v9 Installation guide is based on the VCube v8.0 Guide (for the beta cycle)**
https://www.merging.com/uploads/assets/Installers/beta/JANUS_X.0_Beta2/VCube_v9.0.1_Beta2/VCube_9_Installation_Guide.pdf
- VCube v9 is supported under Windows 7 - 64 and Windows 10 - 64 bit
- VCube v9 runs on new v9 keys as of the Release Candidate
- For recommended VCube configuration refer to our page here:
<http://www.merging.com/support/pc-config>
- Pyramix 25th Anniversary can be installed along with VCube v9

V9 Features:

- VCube v9 is supported under the following Windows 64bit versions.

Windows 10: Anniversary (1607)

Windows 10: Creator (1703)

Windows 10: Fall Creator (1709)

Windows 10: Spring Creator (1803)

Windows 10: October Update (1809) along with the Zombieload updates

Windows 10: May 2019 Update (1903)

Windows 10 & Windows 7 SP1: With the Meltdown and Spectre updates

Windows 10: November 2019 Update (1909). As of VCube v9.

New Cloud based security available (dongle-less)

A new Cloud security has been implemented for new users needing to run Pyramix, Ovation or VCube without a Merging SafeNet Dongle.

Note: SafeNet keys cannot be transferred to this Cloud security model for a chosen release. This process can only be done for now at the Upgrade stage.

- Version in sync with Pyramix v12.

Technical Notes:

- VCube not supported on Core2Duo. Minimum requirement is a QuadCore.
- VCube 9 is supported under Windows 7 (64bit) and Windows 10 (64bit)
- VCube Known issues: <https://confluence.merging.com/pages/viewpage.action?pageId=41713706>

Blackmagic design Video Cards Support Configuration:

As of VCube 5.1, Merging now supports Blackmagic design Video Cards thru the DeckLink SDK. This covers DeckLink, UltraStudio and Intensity product lines. Decklink Studio 4K, Decklink 4K Extreme and Decklink 4K Pro have been validated. The DeckLink Studio monitor is known to working but has no Video reference to ensure genlock.

Note: The Decklink 8K Extreme Pro is not supported above 4K DCI / 25 fps

Blackmagic design installer recommended versions is 10.11.X and v11.X is supported as of VCube 9. Known issue: The Settings panel must be opened under Windows.

Installation/Setup:

1. Go to <http://www.blackmagicdesign.com/support>
2. Follow the 3 easy steps to select a product (in this example, DeckLink Studio 4K on Windows)

The screenshot shows the 'Support Center' page with a lifebuoy icon. Below the icon, it says 'Select your product in 3 easy steps'. There are three steps: 1. Host Computer Type (radio buttons for Mac OS X, Linux, Windows, with Windows selected), 2. Product Series (dropdown menu showing 'DeckLink'), and 3. Product (dropdown menu showing 'DeckLink Studio 4K' with an 'Include Legacy' checkbox and a 'Search' button).

3. Download the Desktop Video package.

The screenshot shows the 'Support Center' page for 'DeckLink Studio 4K for Windows'. It features a lifebuoy icon and a 'Change your product >' link. Below are two columns: 'Downloads' and 'Online Resources'. Under 'Downloads', there are two items: 'Desktop Video Manual' (13.36 MB) and 'Desktop Video 10.1.1 for Windows' (121.9 MB). The 'Download' button for the Desktop Video 10.1.1 for Windows is highlighted with a red box. Under 'Online Resources', there are two items: 'DeckLink FAQs' and 'Support Notes'.

4. Register and Download your Software:

Note: you don't have to register to download the Desktop Video package. Just press "Download now" to get the package download started.

5. Once downloaded, un-zip the package.

6. Run the DesktopVideo_x.x.x.msi installer and follow the specific instructions.

7. Restart your system once the installation is completed.

Behavior description

Enable Blackmagic design video I/O in VCube.

1. Start VCube.

2. Prompt the Video I/O setting tab (SHIFT-ALT-P).

4. From the drop down menu select "Blackmagic design" and enable the card

The Video I/O Plug-in tab gets populated. Depending on options and card properties, you'll get access to the following options:

Hardware

If several Blackmagic design cards are installed, you can select the one you control from the Board dropdown.

Video Engine

Format: Choose video format / resolution. HD formats will require the proper keys.

Reference: Indicator of the video reference. Note: Some cards might not support this

1080p mode: Segmented frame mode; Progressive or segmented (for VTR supporting Interleave).

Note: We recommend users to use the VCube quick SD (ALT+F5) and quick HD settings (ALT+F6) in order to automatically configure the format and 1080p mode.

Input Video & Reference

Video Input: Only valid for some Blackmagic cards supporting input. Note that this option is only available for VCube SE users. Allows users to select video input source (connector); Choices can vary from; SDI, HDMI, Component, Composite, S-Video

Input Format: Only available on some Blackmagic cards. Indicates the input video format. Only active when in record Mode.

Audio Output Selection

Audio Output: Choice can vary with different Blackmagic cards. Users must select their audio output source. Available possible physical output choices (example: DeckLink-Studio); 4 analog, 2 AES or 2 Audio, 6 AES

Audio Input Selection

Audio Input: Choice can vary with different Blackmagic cards. Users must select their audio input source. Available possible physical input choices (example: DeckLink-Studio); Embedded, AES/EBU, Analog.

Open Control Panel:

Will open the Blackmagic Design control panel
