Show LTC / VITC Settings	Ctrl + F2

Layer Source/Destination Rectangles

Twin Rectangles button in the layer header displays a setting rectangle on the preview screen. The mouse pointer now displays specific tools for resizing. Layer number, top left corner position horizontal and vertical sizes are displayed. A Source button is visible in the destination rectangle. Press this button to reach the settings dialog for the source rectangle.
Click and **Drag** the external handles to adjust rectangle size.
Double-Click constrains the handle to the sided edge of the screen.
Ctrl + Double-Click on the central handle restores the layer at its original size.
UP DOWN LEFT RIGHT keys can also be used to move the rectangle.
Ctrl + UP DOWN LEFT RIGHT keys resize the rectangle.
In this mode the top left handle becomes the fixed reference point.
Shift + UP DOWN LEFT RIGHT keys resize the rectangle.
In this mode the bottom right handle becomes the fixed reference point.
ENTER validates Source Rectangle settings and closes the window.
Both Source and Destination Rectangles can be adjusted by using **Alt + Click** and **Drag** on resize handles.
Tab selects the layer you're working on from top to bottom.

Workspaces

Load Workspace 1	Shift + 1
Load Workspace 2	Shift + 2
Load Workspace 3	Shift + 3
Load Workspace 4	Shift + 4
Load Workspace 5	Shift + 5
Load Workspace 6	Shift + 6
Load Workspace 7	Shift + 7
Load Workspace 8	Shift + 8
Load Workspace 9	Shift + 9
Load Workspace 10	Shift + 0
Generate Workspace 1	Ctrl + 1
Generate Workspace 2	Ctrl + 2
Generate Workspace 3	Ctrl + 3
Generate Workspace 4	Ctrl + 4
Generate Workspace 5	Ctrl + 5
Generate Workspace 6	Ctrl + 6
Generate Workspace 7	Ctrl + 7
Generate Workspace 8	Ctrl + 8
Generate Workspace 9	Ctrl + 9
Generate Workspace 10	Ctrl + 0
Apply Simple Mode	Alt + F1
Apply Advanced Mode	Alt + F3

Overlay

Toggle Burnt In TimeCode	B
Toggle External TC	Alt + B
Toggle Mask On / Off	M
